2. Standard commercial commodities will be specified whenever possible.
3. A specification is restrictive when the specifications, requirements, restrictions, or conditions have the effect of limiting responses to only one brand, make, source of supply, or service provider and have no reasonable relation to the actual needs of the purchasing agency.

3. Whenever an agency specifies products or services exclusive to a particular individual, company, manufacturer, or brand name to the exclusion of competitive products or services, the proprietary product or service will be procured competitively, unless it is available only from one source of supply or emergency circumstances exist.
